

'Clonizo InfoXtract' automates the time consuming and repeatable tasks with the help of advanced AI and machine learning.

## Automate & generate real time insights

### Documents

Extract meaningful information from variety of documents such as ID cards, invoices and contracts

### Text

Analyze data from customer feedback, surveys, blogs and social media

### Conversations

Convert speech to text and eliminate the need of feeding information manually

### Image recognition

Analyze images to automate processes and understand consumer behaviors

### Video analytics

Know your customer; understand footfall, event & logo placement effectiveness

## Use Cases

### Process automation

Accelerate processing and analyses by getting data as structured outputs

### Controls and compliance

Extract items, amounts, merchant name from expense receipts and invoices

### Early warning signals

Analyze external data on industry performance; listen to customer sentiments

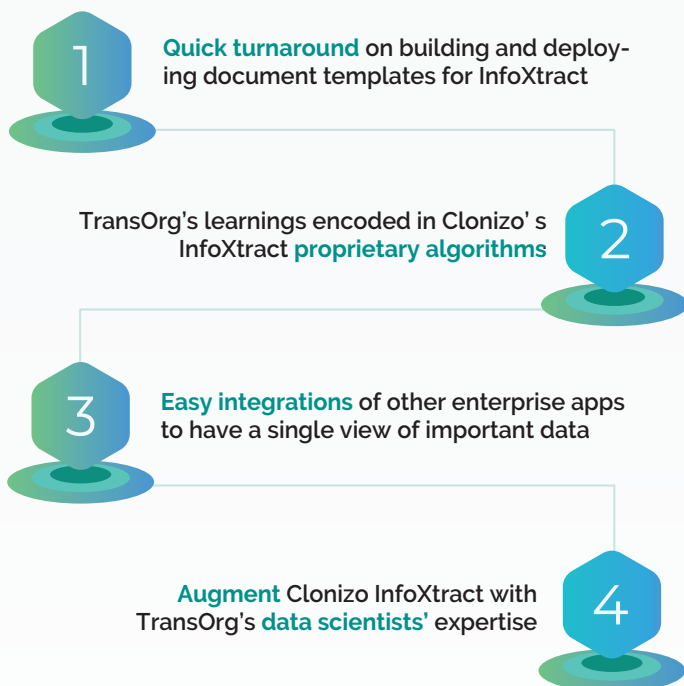

### Contactless servicing

Eliminate the need of customers and sales reps filling in the forms

### Improve predictions

Enrich your analyses with unstructured and alternate data
